| Description              | Optical distribution frame compatible with HDX cassettes. Accepts up to 12 cassettes of 12 fibers each, totaling 144 fibers (72 ports) per rack unit. Supplied with fitting rails for the cassettes.<br>The cassettes must be purchased separately.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Advantage                | <p>Suitable for <b>high density</b> of fiber optic environments in <b>plug and play</b> systems. Allows:</p> <ol style="list-style-type: none"> <li>1. Modularity and flexibility with easy of expansion without quality degradation;</li> <li>2. Fast and easy installation and reconfiguration;</li> <li>3. Simple handling.</li> </ol> <ul style="list-style-type: none"> <li>• Compatible with HDX type cassettes;</li> <li>• Accepts up to 12 cassettes HDX with 12 optical fibers each (total of 144 optical fibers ports per rack unit);</li> <li>• Installation in racks of 19 inches;</li> <li>• Supplied with frontal cable manager for better optical cords organization;</li> <li>• Removable upper cover;</li> <li>• Cable entrances on both sides and rear;</li> <li>• Sliding drawer allows easier installation and maintenance, without removing the ODF from the rack for future handling;</li> <li>• Supplied with anchorage system and storage area for incoming cables with an accomodation area for the excess fibers..</li> </ul> |
| Installation Environment | Indoor                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Operation Environment    | Non Aggressive                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
