

PPWR Compliance Statement

Regulation (EU) 2025/40 on Packaging and Packaging Waste

Acal BFi is committed to supporting compliance with the applicable requirements of Regulation (EU) 2025/40 on packaging and packaging waste (PPWR), which applies from 12 August 2026.

We have implemented appropriate processes to identify and address the PPWR obligations applicable to our activities and our role within the supply chain. This includes working with our manufacturers, suppliers and packaging partners to obtain relevant packaging information and supporting compliance documentation where required.

For packaging sourced or specified directly by us, we assess the applicable PPWR requirements and maintain or obtain appropriate supporting information and documentation in accordance with our role under the Regulation.

Where products and their associated packaging are supplied by third-party manufacturers and passed through our distribution chain without modification, we work with the relevant manufacturer, importer or packaging supplier to obtain appropriate information relating to the packaging and its compliance with applicable PPWR requirements. Packaging documentation and declarations are therefore product, supplier and packaging specific.

Where Acal BFi acts as a distributor, we undertake the checks and exercise the due care required of distributors under the PPWR. Where our activities mean that we assume the obligations of a manufacturer or importer under the PPWR, the applicable requirements for that role will be addressed accordingly.

Upon reasonable request, we will support customers by providing relevant packaging information or available compliance documentation for the packaging concerned, subject to availability from the relevant manufacturer or supplier.

The PPWR introduces requirements with different obligations applying at different dates. We continue to review our processes in light of applicable European Commission guidance and harmonised standards as these are adopted or updated.

This statement describes Acal BFi's approach to PPWR compliance. It is not, and should not be relied upon as, an EU Declaration of Conformity for any particular packaging or product. Where an EU Declaration of Conformity is required under the PPWR, this will be packaging-specific and issued by the economic operator responsible for doing so under the Regulation.
