

HDX MODULAR PATCH PANEL

Description	Modular Patch Panel compatible with cassettes HDX type, with capacity for up to 12 cassettes in 1 rack unit. Supplied with fitting rails for the cassettes. The cassettes must be purchased separately. Suitable for pre-terminated systems, doesn't accept splice trays for fusion splice systems.
Advantage	Compatible with HDX products is suitable for high density fiber optic environments in plug and play systems. Allows: • Modularity and flexibility with ease of expansion without quality degradation; • Fast and easy installation and reconfiguration; • Simple handling. • Compatible with cassettes HDX type; Accepts up to 144 fibers in 1U through 12 cassettes; Installation in racks of 19 inches; Supplied with frontal cable manager for optical cords routing; Presents corrosion resistance for installing according to internal environments defined by ANSI/TIA-569; Supplied with mounting rails for the cassettes.
Installation Environment	Indoor
Operation Environment	Non Aggressive
Height (mm)	43.7mm
Width (mm)	491,5 mm
Depth (mm)	344,5 mm
Color	Black
Paint Type	Plastic Textured Finish
Main Product Material	Steel SAE1020
Thickness sheet (mm)	1.2mm

Compatibility	• Racks and cabinets standard 19". • Optical cassettes HDX type.
Included Accessories	• Rack mounting screws • Cage nuts for rack mounting • Accessories for anchoring and routing the cables • Installation Handbook • Plastic rail fixing system for HDX cassettes
Warranty	12 months
Standard	ANSI/TIA-569-C EIA/ECA-310-E
RoHS	This product is in accordance with the RoHS European Directive: a directive on the restriction of the use of certain hazardous substances and related to the environmental preservation.
