

Environmental Policy

Acal BFi UK Ltd recognises its environmental responsibilities in local, national and global terms therefore it is committed to taking a strong lead in achieving an excellent standard of environmental control, whilst maintaining its position as Europe's leading supplier of specialist technologies.

Our Environment Management System (EMS) enables us to achieve our environmental objectives by measuring the continual improvement of the EMS and the environmental performance of our company.

Our EMS complies with the requirements of ISO 14001:2015

Signed on behalf of the
Acal BFi UK Management Team

Vince Synnott

Vince Synnott
Acal BFi UK Managing Director

February 2022

Our environmental policy is :

To be committed to ongoing protection of the environment, the prevention of pollution and continual improvement.

To achieve these commitments, Acal BFi UK has established the following environmental objectives:

- to comply with environmental legislation, regulations and obligations.
- continually review activities with regards to impact on the environment, changing legislation and best practice.
- to reduce buildings' energy consumption.
- to monitor and review all operational processes to identify and implement energy reduction.
- to encourage the use of recycling wherever possible "Reduce, Reuse, Recycle".
- to reduce waste and ensure that it is disposed of in a manner that is in accordance with current legislation and does no harm to the environment.
- to minimise emissions.

The Acal BFi UK senior management team accepts responsibility and authority for:

- ensuring that the EMS conforms to applicable standards.
- providing the resources needed to implement and maintain the EMS.
- reporting on the performance of the EMS.
- providing opportunities for improvement for the EMS.
- ensuring the promotion of environmental management throughout the organization.
- ensuring that the integrity of the EMS is maintained when changes are planned and implemented.
- ensuring all employees are familiar with the environmental policies and procedures.
